

# **GENERAL PURPOSE COLORS 7600 SERIES**

#### **RECOMMENDED FABRICS**

100% Cotton 50/50 Cotton/Polyester Blends

# **INK APPLICATION**

General Purpose Color (7600 Series) should be printed without any modifications

**ADDITIVES**If viscosity adjustment is necessary, use 1% to 3% by weight of 1110 Curable Reducer

#### **SCREEN MESH**

61-305 t/in (43-120 t/cm) monofilament

### **EMULSION**

Any direct or indirect emulsion or capillary film in the 35 to 70 micron range

# **SQUEEGEE**

65-70 Durometer Sharp edge

# **CURE TEMPERATURES**

275°F to 325°F (135°C to 163°C) the entire ink film.

# **CLEAN-UP**

Any eco-friendly plastisol screen

# **PRODUCT PACKAGING**

Quart, 1 gallon, 5 gallon, 30 gallon or 50 gallon containers

# STORAGE OF INK CONTAINERS

65°F to 90°F (18°C to 32°C)Avoid storage in direct sunlight

Keep containers well sealed

# Refer to SDS prior to use

SDS

### **FEATURES**

General Purpose Colors 7600 Series Plastisol Inks consists of 26 non-phthalate, high performance colors, formulated for ultra high speed wet-on-wet automatic printing.

General Purpose Colors offer superior performance through fast production speeds, good opacity, and wide range of popular colors. General Purpose Colors 7600 Series is part of the FlexCure<sup>™</sup> line of products, which gives you a flexible curing range from 275°F to 325°F (135°C to 163°C)

#### **GENERAL PURPOSE COLOR INKS:**

Are well suited for fine detail and halftone printing using finer mesh counts and contain a high pigment load for maximum coverage.

Can print through higher mesh counts on light-colored garments or can be reduced to obtain soft-hand, opaque prints.

#### **COLORS**

Super Light Gold 7602 Bright Orange 7626 Columbia Blue 7660 National Red 7606 Golden Yellow 7627 Royal Blue 7666 Bear's Navy 7608 Super Drake Red 7628 Navy Blue 7668 Dark Navy 7610 Dark Gray 7630 Dallas Green 7672 Graphics Purple 7616 Light Gray 7632 Kelly Green 7673 Low Build Black 7617 Pink 7637 Lime Green 7677 Island Blue 7618 Dallas Red 7645 Vegas Gold 7681 Lemon Yellow 7623 Scarlet 7646 Chocolate Brown 7689 Light Royal 7624 Maroon 7656

# **SPOT FLASHING**

General Purpose Colors will spot dry, with a very low after flash tack. Dwell time is dependent on the spot dryer used. In some cases, you may have to lower the heat of the spot cure unit because too much heat may actually make the ink tacky. When you spot dry, you are only partially fusing or gelling the surface of the ink. The ink should just be dry to the touch, with no lift-off, but not totally fused. Totally fusing the underprint white may cause inter-coat adhesion problems with the inks printed on top of the white ink. Final fusing or curing should occur in the dryer.

#### IMPORTANT INFORMATION

Use an underbase print when printing General Purpose Colors onto dark fabrics. Use 7022 Cool White™, Legacy White™ 7014, Ultra White™ 7031, or Paramount White™ 7041 as an underbase ink. To achieve a softer hand and faster production speeds, print underbase ink through finer mesh counts (230 to 305 t/in or 90 to 120 t/cm mesh).

Adding too much reducer or other additives to the 7600 Series inks may cause curing/ fusing or increased dye migration problems.

Excessive squeegee pressure will drive the General Purpose Colors through the fabric being printed. Adjust squeegee pressure, angle and off-contact to insure proper shear and lay down of the printed ink.

Test dryer temperatures and wash-test printed product before and during a production run.

## **LEGAL DISCLAIMER**

Recommendations and statements made are based on International Coatings' research and experience. Since International Coatings does not have any control over the conditions of use or storage of the product sold, International Coatings cannot guarantee the results obtained through use of its products.
